

## GAMMA Chapter Annual Report

We received lots of inquires about the MDRAO conference. We had 8 attend the conference. The main issue that we had was being able to get the time and then the expense as most Hospitals are not wanting to assist with the expenses. So we will be looking at helping out with a few more delegations Fee's being paid.

We had a meeting in Arnprior Hospital with Andy speaking about PPE and the importance of using the proper protection. He also talked about the new liners and the wrappers. Yes, he kept it to his time line as we all know that he likes to pass on as much information as possible.

We had a couple other OTN meetings that let us get an update about what was happening.

Beth Fraser and Dean Zieman attend the Theta Education weekend. And as always found it to be very informative.

We had a meeting May the 6th to discuss about the new executive and what we would like to do in the upcoming year. We are looking for people to join the executive but some of the newer members are wanting to learn more about the Chapter. So we will be moving to new positions and next time we hope some of the newer members will want to take over.

We will be having an Education day in the fall before the snow falls. It will be held at Almonte General Hospital. We are sending out an email asking members what they want to have education about. One main topic will be about scopes and the changes that are continually being made to the standards to protect the patient and the reprocessee.

Will have a meeting at the beginning of June to finalize the details. We then will be sending the members the information and registration package.

Look forward to a great new year for the Gamma Chapter

It has been a wonderful time as President and looking forward to working with the new one. Hope that there is support from the present and the new members to revive the Chapter to be flamboyant as the past.

Thank you  
David A Bobier  
Gamma Chapter President
