

Sigma Chapter Report

Hello everyone,

We hope that you are adapting well to this cold weather! Before we know it the winter holidays will be upon us.

For those members who weren't able to attend our September Sigma Chapter meeting and education session, please look to the MDRAO website for our chapter minutes and PDF presentation on Creutzfeldt-Jakob Disease, compliments of Helen Shaw. We also had Jamie Pilouff from Olympus speak on Safe Handling of Endoscopes. Following our two hours of education, Sigma's Educator Stacey Marshall led a tour of Sarnia's Bluewater Health MDRD.

Our next education session is on

the importance of testing
Laparoscopic Insulation Sheaths.
This chapter meeting and
education session will be hosted
via OTN. Event number and
additional information will be
soon to follow.

As always, we are very thankful
for all of our long time standing
members as well as our ever
growing numbers of new
members. As of October 2018 the
Sigma Chapter has 59 members
which include Technicians,
Managers and Associates.

On behalf of the Sigma Chapter
we want to wish you all a safe
and happy holidays!
